

DETECTIVE

Code? What code? You and these other guys running around here talking about street values , codes and all that, but wouldn't hesitate to get one over or take the life of an innocent person standing in their way. What kind of code is that? Steal from the rich and give to the poor, redistribute wealth, product of a society or some other sorry excuse to skirt the law and get over on the people trying to hack it. The same kind of people you say you're looking out for. Don't ever compare yourself to me or talk to me about codes. You don't know what it means to protect or serve anything.
